QUEUEING THEORY		
I. N. Kovalenko		
Introduction	1	5
Systems with Delays	1	6
Systems with Losses	6	14
Systems with Finite Waiting Space, Balking, and Reneging	8	18
Systems with Time Constraints	9	21
Priority Systems	10	22
Time-Sharing Systems	12	25
Systems with Batched Service and Batched Input	13	28
Standby Redundancy Theory	14	31
Systems with Finite-Reliability Servers	15	33
Theory of Point Processes	16	34
Output (Departure) Processes	20	42
Systems with State-Dependent Input or Service	21	44
Multiphase Service	22	46
Closed Queueing Systems; Machine Servicing	24	48
Asymptotic Methods in Queueing Theory	24	49
Classes of Systems	27	54
Statistics of Queueing Systems	27	55
Literature Cited	29	58

Volume 2, Number 2 March-April, 1974

Editor's Preface – N. Nikol'skii	67	7
Factorization of Analytic Functions Having a Derivative in H^p – S. A. Vinogradov and N. A. Shirokov	68	8
Duality and Isomorphism of the Spaces of Solutions of Certain Linear Elliptic Equations and Systems with Analytic Coefficients – S. V. Gurov	84	28
Completeness of the Wave Operators for Uniformly Propagative Systems – V. G. Deich	90	36
Spectral Properties of Unitary Operators in C-Space – A. K. Kitover	99	47
Unitary Spectrum of a Contraction in Banach Space – A. S. Markus, L. N. Nikol'skaya, and N. K. Nikol'skii	112	65
Spectral Analysis on the Unitary Spectrum; the Point Spectrum. Part II – N. K. Nikol'skii	120	75
Stability of Unicellularity for Analytic Perturbations of Class Ω_0^+ – N. K. Nikol'skii	131	89
Embedding Theorems for Weighted Classes of Harmonic and Analytic Functions – V. L. Oleinik and B. S. Pavlov	135	94
Continuation of L^p-Isometries – A. I. Plotkin	143	103
Maximality of the Algebra of Functions Continuous on the Extended Complex Plane and		

Engl./Russ.

Analytic in the Complement of a Completely Discontinuous Compactum — V. N. Senichkin 166 130
Absolutely Regular Trajectories in Hilbert Space — V. N. Solev 174 139
Impossibility of the Carleman Approximation of Functions Continuous on the Unit Circle by the Boundary Values of Functions Analytic and Uniformly Continuous on the Unit Disk — V. P. Khavin 193 161

BRIEF COMMUNICATIONS
On the Closedness of the Image of a Convex Set — E. L. Arenson 201 171
Potential Theory and Geometrical Optics — V. S. Buslaev 204 175
Individual Theorems of the Wiener-Lewy Type for Fourier Series and Integrals — E. M. Dyn'kin 210 181
On the Traces of V_2-Elements — Yu. I. Kopilevich 212 183
The ω-Independence, Stability, and Mass of Eigenvector Sets for Linear Operators — L. N. Nikol'skaya 218 190
On the Equivalent Right Regularizer — O. I. Panich and V. A. Solonnikov 220 192
Divergence Sets of Integrals of the Potential Type with L^p-Densities — S. P. Preobrazhenskii 224 196
Example of a Thick Polynomially Convex Compact Subset of Space C^2, with Connected Interior, on Which Not Every Continuous Function Analytic at Interior Points Is Uniformly Approximable by Polynomials — V. N. Senichkin 226 199
Factorization of Analytic Functions Smooth to the Boundary — V. P. Khavin 228 202
Division by an Inner Function in Certain Spaces of Functions Analytic in a Disk — F. A. Shamoyan 232 206
Uniform Approximation of Functions on Closed Sets without Corner Points — N. A. Shirokov 235 209

Volume 2, Number 3 May-June, 1974

ALGEBRA
ABELIAN GROUPS
A. P. Mishina
§1. Primary Groups 239 5
§2. Torsion-Free Groups 240 8
§3. Mixed Groups 241 9
§4. Direct Sums. Complete Direct Sums 242 11
§5. Purity and Its Generalization 245 16
§6. Quasi-isomorphism 247 21
§7. Endomorphisms, Automorphisms, Homomorphisms, Isomorphisms of Subgroups 249 24
§8. Ext, Hom, Tor, Tensor Product 250 27
§9. Other Questions 252 30
Literature Cited 254 33

ABSTRACT ALGEBRAIC GEOMETRY
I. V. Dolgachev
§1. Foundations of Algebraic Geometry 264 47
§2. Cohomologies of Algebraic Varieties and of Schemata 268 56
§3. Fundamental Group and Homotopic Invariants of Schemata 275 69
§4. Ample Sheaves. Projective Imbeddings of Abstract Varieties 277 73
§5. Construction Techniques in Algebraic Geometry 278 75
§6. Formal Geometry 284 87
Literature Cited 286 91

GEOMETRY
DIFFERENTIAL GEOMETRY OF FAMILIES OF LINES AND SURFACES
V. S. Malakhovskii
Introduction. 304 113
§1. Families of Conics and Quadrics in Three-Dimensional Spaces. 304 114
§2. Families of Algebraic Surfaces in a Multidimensional Space 308 122
§3. Families of Circles and Spheres in Euclidean and Conformal Spaces 311 126
§4. Families of Lines and Surfaces. 315 133
§5. Manifolds of Figures in an n-Dimensional Homogeneous Space 319 141
Literature Cited. 320 143

GEOMETRY OF WEBS
V. D. Belousov and V. V. Ryzhkov
I. Differential Geometry of Webs 331 159
Introduction 331 159
I.1. Tensor Theory of Webs. Webs on Surfaces 332 161
I.2. Multidimensional Webs and Analytic Loops and Quasigroups 335 166
I.3. Webs and Nomography. Rectifiability. Uniqueness Problem. 336 168
I.4. Webs Composed of Manifolds of Different Dimensions 338 170
I.5. Other Directions of Research 338 172
II. Algebraic Nets (Webs) 339 178
II.1. 3-Nets. Closure Conditions in 3-Nets 339 179
II.2. k-Nets. Connection with Affine and Projective Planes 341 182
II.3. Other Forms of Nets 342 184
Literature Cited. I. 343 173
Literature Cited. II. 347 186

Volume 2, Number 4 July-August, 1974

On the Stability of Projection Methods – Yu. K. Dem'yanovich 349 7
On the Number of Conditions of a Coordinate System – L. N. Dovbysh and V. N. Sudakov . . 356 16
On Some Properties of Functions from $W^{l}_{p,a,\varkappa(G)}$ Spaces – V. P. Il'in. 369 33
The Application of a Nine-Point Scheme of the Method of Lines to Some Nonlinear Boundary Value Problems – A. P. Kubanskaya 376 41
The Application of Orthogonal Transformations to the Solution of Nonlinear Systems – V. N. Kublanovskaya 388 53
Application of a Normalized Process to the Solution of the Inverse Eigenvalue Problem of a Matrix – V. N. Kublanovskaya 405 72
On the Inverse Eigenvalue Problem of a Matrix – V. N. Kublanovskaya and V. B. Khazanov 415 84
An Algorithm as a System of Subprograms and Storage Allocation on Parallel Processors – M. M. Lebedinskii 422 94
On the Difference-Variational Method for Multidimensional Boundary Value Problems – S. G. Mikhlin 427 99
Five Problems on Invariant Subspaces – N. K. Nikol'skii 441 115
On Using Magnetic Drums in the Usage of PRORAB – T. N. Smirnova and V. P. Eremina . 451 128
On the Performance of Calculations in the Usage of PRORAB – T. N. Smirnova, E. M. Kostometova, and Yu. V. Rybakova. 455 132
On an Estimate of the Error of the Solution of the Cauchy Problem for a System of Second-Order Ordinary Differential Equations – M. N. Yakovlev 460 138
On an Estimate of an Approximate Solution of the Cauchy Problem – M. N. Yakovlev. . . . 463 140
The Method of Lines in Nonlinear Boundary Value Problems for Nonlinear Parabolic Equations – M. N. Yakovlev. 466 143

Engl./Russ.

Volume 2, Number 5 September-October, 1974

MULTIVARIATE DISTRIBUTIONS: INEQUALITIES AND LIMIT THEOREMS
Yu. V. Prokhorov

Introduction	475	5
1. Normal Distributions	475	5
2. Inequalities for Characteristic Functions	477	9
3. Multivariate Analogs of the Chebyshev Inequality	480	12
4. Distances between Distributions: Estimates in Terms of Characteristic Functions	482	15
5. The Central Limit Theorem in R^S	483	16
6. Stable Distributions in R^S	483	18
Literature Cited	484	19

GRAPH THEORY
V. P. Kozyrev

Introduction	489	25
1. Characteristics of Graphs	490	27
2. Construction of Graphs Having Prescribed Properties	494	33
3. Directed Graphs	496	37
4. Traversals of Graphs	497	40
5. Connectivity of Graphs	500	45
6. Colorings of Graphs	502	49
7. Topological Problems	505	54
8. Representations of Graphs	507	58
Literature Cited	510	63

INFINITE ZERO-SUM TWO-PERSON GAMES
E. B. Yanovskaya

Introduction	520	75
1. General Existence Theorems	522	78
2. Existence Theorems for Conditionally Compact Strategy Sets in Natural Topology	524	81
3. Existence Theorems for Games on the Unit Square	526	85
4. Uniqueness of the Solutions of Infinite Zero-Sum Two-Person Games	529	88
5. Approximate Methods of Solution	530	90
6. Games of Timing	531	92
7. Games Having Solutions with a Finite Spectrum	533	94
8. Games on Function Spaces	535	97
9. Other Classes of Games	537	100
Literature Cited	537	102

THEORY OF FORMAL GRAMMARS
A. V. Gladkii and A. Ya. Dikovskii

Introduction	542	107
1. Classification of Grammars and Languages; Properties of the Various Grammars and Language Classes	542	108
2. Derivation Control	544	111
3. Complexity Measures for the Recognition of Languages and for Derivation in Grammars	547	116
4. Algorithmic Problems	549	119
5. Abstract Families of Languages; Operations on Languages	549	120
6. Automaton Characteristics of Languages	551	123
7. Other Schemes for the Specification and Description of Sets of Strings	552	125
8. Tree-Processing Grammars	553	128
Literature Cited	556	133

Engl./Russ.

Volume 2, Number 6 November-December, 1974

An Estimate of the Derivative in Certain Classes of Functions, Analytic in a Multiply Connected Domain – Yu. E. Alenitsyn 565 6
On Weighted Szegö Kernels – Yu. E. Alenitsyn 572 16
On Domains of Values of Systems of Functionals in Some Classes of Functions, Representable by a Stieltjes Integral – E. G. Goluzina ..... 582 2[illegible]
On the Coefficients of a Class of Functions, Regular in a Disk and Having an Integral Representation in It – E. G. Goluzina 606 63
On the Conformal Modulus in Classes of Doubly Connected Domains, Not Containing Given Systems of Points – G. V. Kuz'mina 618 78
Estimates of the Conformal Modulus of a Set of Domains and Covering Theorems for Univalent Functions – G. V. Kuz'mina 668 148
On a Variational Formula of G. M. Goluzin – N. A. Lebedev and Din Van Feu 686 173
On a Regularity Theorem of Hayman – N. A. Shirokov 693 182
